

* FIRST Robotics Competition

What is FIRST Robotics Competition?

- In FRC, students have six weeks to design, build and program a robot to participate in a themed challenge
- Combines sports with science and technology
- All skill levels are welcome and needed

This year's game

Example Round

Einstein Playoff Match 4 from FIRST Championships

Departments

01

Mechanics

Assembling the robot

02

Electronics

Creating and managing the electrical systems

03

CAD

Designing the robot with CAD tools

04

Programming

Programming logic between the operator's controls and robot sensors and motors

05

Business

Organizing fundraisers and budgets, managing the team

06

Media

Photography and videography of events and build season, managing social media

Why join?

Develop valuable skills in engineering, coding and problem-solving

Build your interpersonal skills like teamwork, communication and leadership

It's fun!

Timeline

Off-season: training & recruitment

Summer

Aug-Dec

Off-season: events and competitions

New FRC game is revealed,
build season begins

Jan-Feb

Late Feb-April

Competition season

Time Commitment

- FRC should be treated like any other sport or team activity
- During build and competition seasons there will be a large time commitment after-school and during Saturday school
